ABOUT ME

I am a web developer with experience in the development and implementation of technological solutions. I am committed to each of my projects to offer effective work

PROFESSIONAL EXPERIENCE

Front End Developer

Ende Servicios y Construcciones March 2024 - December 2024

I was part of a large team in the development of business ERP implementing a microfrontends and microservices architecture. My work based on developing a simple intuitive and functional user interface, always maintaining good practices and following the established guidelines

- Develop reactive, intuitive and functional graphical interfaces.
- Implement scalable solutions using technologies such as Angular, Primeng, and Primeflex.
- Collaborate with the team to keep guidelines as clear as possible.

Full Stack Developer

AgilSof September 2023 - December 2023

I developed a solution for mass sending of electronic billing via WhatsApp that improved the user experience by receiving their invoices directly on their mobile devices.

- Development and implementation of an application for mass sending of electronic invoices using React and Express.js.
- Integration of API and external services.
- Optimizing application performance and security.

Front End Developer

FunFit March 2023 - September 2023

I developed the user interface for FunFit's ecommerce which included authentication, API consumption, Redux management, CRUD management, style library integration

Full Stack Developer

Finance system January 2023 - March 2023

I supported the implementation of a finance system for profit control and management of purchases and expenses for the company techobol, where I had the opportunity to develop my skills in both backend and frontend.
